DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: the reference sign 312 shown in Fig. 3 is not mentioned in the specification. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 2, line 36, "3," should be – 3; --; on page 6, lines 2 and 12, "cell 1" should be – cells 1 --; on page 7, line 37, "408" should be – 308 --; and on page 8, line 2, "401" should be – 310 --. Further, Applicant is requested to fully describe the operation of Figs. 5 and 6. Appropriate correction is required.

Claim Objections

3. Claims 8-10 are objected to because of the following informalities: in claim 8, line 6, "the said frequency" should be – the same frequency --, wherein claims 9 and 10 are depended upon claim 8. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 10, the phrase "modifying the at least one frequency hopping parameter ..." is indefinite since claim 1 recites a first cell and a second cell. Also see claim 4.

In claim 8, line 7, "the calculations" lacks antecedent basis.

In claim 10, the phrase "in any one of claim 8" is not understood.

Wherein the dependent claims 2-3, 5-7 and 9 are depended upon claims 1, 4, and 8.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dent (U.S. Patent No. 5,425,049).

Dent discloses a communications system in Fig. 6 and Fig. 7 having a frequency hopping scheme which provides increased interferer diversity without increased system delay. The frequency hopping scheme includes providing a staggered offset period between hops of neighboring or adjacent base stations so as to create additional interference situation.

With respect to claims 1-10, in a frequency hopping system each cell can use all of the available channels, but at different times, as determined by a pseudo-random frequency hop sequence generator. Such generators can be constructed either to yield a random probability that any two cells choose to same frequency at the same time. See col. 3, lines 3-22 and col. 6, lines 15-28.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
